

## FORESTRY CALIPER CODIMEX-C

CODIMEX-C is durable forestry caliper that ensures precise measurement. CODIMEX-C has ergonomic construction and graduated on the three sides scale with high resistant to tear off.

CODIMEX-C is a multi-purpose caliper designed for measurements of standing and lying trees.

### CODIMEX-C:

- constructed on the beam (rectangular tube) of the of light aluminium alloy, secured by anodizing.
- graduated on three sides of the beam made with paint penetrating into the material.
- four easy-moving sliders have been installed on the sides of the beam to minimize friction and provide smooth sliding of calipers jaws.
- injection-moulded ABS plastic brackets secure precise measuring.

Calipers CODIMEX-C are certified by KWF (Kuratorium für Waldarbeit und Forsttechnik) and has the PTB type-approval certificate.

Technical Specification:	
Material:	Beam: light aluminium alloy, secured by anodizing
	Handle: ABS material
	Jaws: light aluminium alloy, secured by anodizing
Weight:	40cm: 535 g 50cm: 590 g 60cm: 625 g 80cm: 720 g 100cm: 845 g 120cm: 980 g
Measurement range:	40cm, 50cm, 60cm, 80cm, 100cm, 120cm - Different sizes eg. 150 cm available on request. - Different combination eg. shorter or longer jaws available on request.
Graduation:	- centimetre - millimetre - inches - mixed scale - special scale available on request
Colours:	red /blue/black
