Results and assessments

Results from the 1986 field study

Measuring tape: Spencer Super 15m, 20m and 25m

Grube KG Forstgerätestelle, Hützeler Damm 38; 29646 Bispingen

Field of application

Length measurement of long and short timber

| Feature | Result |
|----------------|--|
| Handling | Simple, spring preload enables good extension and retraction of the measuring tape. Very good winding quality in good conditions. Wire claw or tilting hooks ensure a secure hold in the wood. |
| Measuring tape | Spring steel tape with markings on both sides. Easy to recognise, centimetre graduation with decimetre and metre markings (red) on a yellow background. |
| Maintenance | Measuring tape guide open at the side. This makes it slightly more dirty, but also easier to clean and maintain. Easy to replace, but requires practice. |

Version

Light metal housing with spring encapsulated in the housing, replaceable tape measure, wear piece riveted on with rubber stopper.

Dimensions and weights

| Execution | 15 m | 20 m | 25 m |
|---------------|--------|--------|--------|
| Case diameter | 102 mm | 102 mm | 102 mm |
| Height | 43 mm | 43 mm | 43 mm |
| Weight | 510 g | 600 g | 690 g |

This report is based on practical tests and measurements carried out by professional users according to the specifications of the Expert Committee on Equipment and Tools of KWF e.V.
