Supplier Declaration: GPSR (General Product Safety Regulation) European Commission

With this letter, we hereby declare that Jobman Texet AB and its subsidiaries have established a systematic approach to ensure compliance with the legal requirements outlined in GPSR, to ensure product safety. Below is an overview of our approach and supporting justifications:

Product Safety under GPSR

The General Product Safety Regulation (GPSR) aims to ensure that all consumer products placed on the market are safe for use. To comply with GPSR, manufacturers must conduct and document a risk assessment that addresses all risks and risk categories associated with the product, which Jobman Texet AB and its subsidiaries do.

Requirements and Scope

- GPSR mandates that all consumer products in the EU market are safe and imposes specific obligations on businesses to ensure compliance.
- It applies to non-food products and covers all sales channels.
- GPSR serves as a safety net for products or risks not governed by other EU legislation.
