PRODUCT INFORMATION

Product name: VENTO 3.0 SAFETY TROUSER G/O

Article number: XX71227

Product category: Textiles, clothing and footwear

Product description: The KOX Vento 3.0 cut protection trousers are ideal as an entry-level model for working in the forest. It comes with all the necessary standards and functions, but does not skimp on safety and wearing comfort. The cut protection, which is manufactured in Germany, meets the highest safety standards. Their outer fabric is robust and at the same time pleasantly light. An additional eye-catcher are the details in signal colours, such as the ruler pocket and belt loops. They give the KOX cut protection trousers more visibility.

Warnings / Warning icons: Cut-resistant trousers only provide protection for the areas that are reinforced with cut-resistant material (usually the front of the legs). They do not protect against cuts on other parts of the body. The cut protection of the pants is not absolute. Cut-resistant trousers reduce the risk of injury, but do not offer complete protection against chainsaw cuts and are limited in their protective effect to certain chain speeds and forces. The pants are designed for use with handheld chainsaws. It is not suitable for protection in other activities. Instruction and training in the safe use of the equipment and chainsaw are required. The protective effect can be impaired by improper care or damage. It is recommended to follow the manufacturer's instructions for care (e.g. washing instructions, temperature specifications). Damaged or worn trousers must not be used. Cracks, holes or visible wear and tear can impair the protective effect. Cut protection trousers have a limited lifespan. Material fatigue due to aging and frequent use can reduce the protective performance. The pants must fit correctly to provide optimal protection. Cut protection trousers are part of personal protective equipment (PPE) and should be used in combination with other protective measures (e.g. safety shoes, safety helmet with visor, gloves).

Test standards/certifications: EU type-examination certificate K-EU 2022/8908; EN ISO 11393-2:2019 published in the Official Journal of the European Union. EN ISO 11393-2:2019, Form A, Class 1 Protection area over the entire front of the trouser legs.
