PRODUCT INFORMATION

Product name: MISTRAL 3.0 SAFETY TROUSER R/Y

Article number: XX71229

Product category: Textiles, clothing and footwear

Product description: The KOX Mistral 3.0 cut-resistant trousers stand out with their two new colour combinations. The modern design has been combined with the proven features of the previous model. The lightweight cut-resistant trousers are practically equipped, but do not skimp on comfort and safety. The breathable stretch fabric ensures good mobility and is complemented by high-quality cut protection Made in Germany. Durable and water-repellent reinforcements at the leg cuffs protect against dirt and moisture. The highlight on warm days are the extra-long ventilation zippers with mesh lining on the back of the legs. The large side pocket with integrated mobile phone pocket rounds off the KOX Mistral 3.0 cut protection trousers.

Warnings / Warning icons: Cut-resistant trousers only provide protection for the areas that are reinforced with cut-resistant material (usually the front of the legs). They do not protect against cuts on other parts of the body. The cut protection of the pants is not absolute. Cut-resistant trousers reduce the risk of injury, but do not offer complete protection against chainsaw cuts and are limited in their protective effect to certain chain speeds and forces. The pants are designed for use with handheld chainsaws. It is not suitable for protection in other activities. Instruction and training in the safe use of the equipment and chainsaw are required. The protective effect can be impaired by improper care or damage. It is recommended to follow the manufacturer's instructions for care (e.g. washing instructions, temperature specifications). Damaged or worn trousers must not be used. Cracks, holes or visible wear and tear can impair the protective effect. Cut protection trousers have a limited lifespan. Material fatigue due to aging and frequent use can reduce the protective performance. The pants must fit correctly to provide optimal protection. Cut protection trousers are part of personal protective equipment (PPE) and should be used in combination with other protective measures (e.g. safety shoes, safety helmet with visor, gloves).

Test standards/certifications: EU type-examination certificate K-EU 2022/8916; EN ISO 11393-2:2019 published in the Official Journal of the European Union. EN ISO 11393-2:2019, Form A, Class 1 Protection area over the entire front of the trouser legs.
