

**Supplier Declaration: GPSR (General Product Safety Regulation)
European Commission**

With this letter, we would like to take the opportunity to reassure you that Jobman Texet is committed to full compliance with the General Product Safety Regulation (GPSR), and we are diligent in ensuring that our products meet all relevant safety and regulatory standards. We have established a systematic approach to ensure compliance with the legal requirements outlined in GPSR, in order to ensure product safety. As part of this commitment, we have conducted risk assessments for all our products, which are in line with the current requirements set out by the GPSR.

The risk analysis is based on the information and interpretations we have made of the regulation at the moment and that it is a living document that will be updated if new guidelines are communicated from the Swedish Consumer Agency and/or the European Union.

All Jobman's articles with EN-certificate comply to EU 2016/425 Regulation – (PPE) Personal protective equipment with each their own Declaration of Conformity on www.jobmantexet.se in 20 languages. Where you can find the relevant harmonized standards used or reference to the other technical specification in relation to which conformity is declared:

- The risk assessment, the full address of the manufacturer (Jobman Texet AB).
- The notified body that performed the EU type- examination and issued the certificates.
- Batch number and contact details to customer service can be found inside the garment.

In addition, we would like to clarify an important point regarding textiles and their regulatory requirements. Under the GPSR, textiles that do not pose any specific risk, do not require a Declaration of Conformity.

Regarding the labelling on our products, we want to assure you that if the labelling of the products you receive from us does not align with the provisions of the GPSR, there is no cause for concern, since these were placed on the market before December 13, 2024.

Jobman Texet has updated all our labels according to GPSR but some of the products in stock might not be in accordance with GPSR. However, as described above, they were placed on the market prior to the enforcement of GPSR, meaning that they are legal.

We understand that compliance with regulations can sometimes be a complex matter, and we are always here to support you with any questions or clarifications you may need. Please feel free to reach out to us at any time should you require further information or assistance.

Thank you for your continued trust in our products. We truly value our relationship and remain committed to delivering high-quality, compliant products to meet your needs.

Krister Jonfelt
